

One of my key accounts, an international operating banking-software provider based in Zurich-City has mandated me to find a

(Senior) Business Analyst (Core Banking System) (m/f 100%)

Company: Swiss software provider for banks (niche player)
Important to have: experience as a Business Analyst in the banking area
Team: 8 team members
Place of work: In the heart of Zürich City

Main Tasks:

- You will provide business and application consulting/analyses for front office banking applications (core banking application)
- You will be based in Zürich and work at their clients in Switzerland
- Analysis, consulting, parameterization and end-user training for the implementation and upgrade of the system and other solutions provided by the client
- Analyse business processes, define requirements and define effective implementation concepts
- Write functional gap analysis, process documentation and functional specifications
- Install, implement and parameterize front office systems and other banking applications
- Participate in development and testing of the applications
- Prepare and manage user acceptance testing.
- Provide training for users and IT

Professional skills, education and experiences:

- University degree or equivalent in engineering
- 2-4 years of **experience as a business analyst or project manager in the banking environment**
- Nice to have: Implementation and parametrization of banking applications
- Nice to have: Knowledge of client data management, CRM in the context of banking
- **Good general bank software knowledge: databases, operating systems, web applications.**
- Excellent interpersonal skills; experience with working in distributed, international teams
- Strong analytical skills; proactive and solution oriented
- Good presentation, communication and documentation skills
- Good resistance to stress from multiple projects and changing priorities
- A good command of written and spoken English and **German (must)**, French is an advantage
